

ANDITORK First – Bottle top/cap torque tester

↳ ANDITORK is designed for measuring the opening/closing torque of bottles tops and caps.

↳ A large plate mounted with rubberised fingers can accept samples from 0.4” to 7.5”.

↳ It is possible to measure the torque in both clockwise and anti clockwise sense.

↳ The display is a CENTOR FIRST: display the peak torque or the current value.

↳ For small sized samples, the MICROTORK is made of a little plate with rubberised fingers able to maintain bottles up to 2.75” diameter.

Technical features:

- ✓ Capacity: 100 lb Fin
- ✓ Units: Nm – Kgcm - lbin
- ✓ Resolution: 1 lbFin
- ✓ Accuracy: 0,5% PE
- ✓ Data acquisition rate: 1000Hz
- ✓ RS232 output

Reference	ANDITORK FT10
Capacity	100 lb Fin
Max diameter	7.5 in
